## Présentation

The Licence Economics - International Track is the Undergraduate degree in Economics (Taught in English) at the Sorbonne School of Economics

Pour une présentation en Français, cliquez [ici](#).

The Sorbonne School of Economics is launching a new **Undergraduate degree program in Economics starting in September 2025**. It is a **national degree (Licence Economics) fully taught in English**, designed for both French and international students. This program will welcome **250 students in the first year** and offers a unique opportunity to study Economics at one of France's top universities, with affordable tuition fees.

The **Licence Economics – International Track** is an **Undergraduate degree in Economics**. It is a new track within the existing undergraduate degree of Economics program at the Sorbonne School of Economics. It is available through the French University application platform **Parcoursup**, alongside the general Economics track.

This program supports the university's strategy to expand its international offerings and meet the growing demand for **high-quality, English-taught programs in Economics**. It allows students to pursue an international education **with low tuition fees (175 euros per year + 103 euros CVEC)**.

## Objectifs

The undergraduate program in Economics at Sorbonne School of Economics is designed to provide a solid foundation in economic theory, while offering a broad perspective on the social sciences. The curriculum includes a balance of theoretical and applied courses, all taught entirely in English within the international track.

### Program Overview:

- **Core Courses:** The program follows the same curriculum as the general economics track, but all courses are taught in English. Students will explore both fundamental theoretical subjects such as *Introduction to Economics*, *History of Economic Thought*, *Microeconomics*, and *Macroeconomics*, alongside more applied and descriptive courses, including *Comparative Economic Theories*, *European Economics and Policies*, *Social Protection*, *Monetary and Financial Economics*, and *Sustainable Development Economics*.
- **Quantitative Skills:** A strong emphasis is placed on developing quantitative and analytical skills with courses like *Mathematics for Economists*, *Matrix Calculations and Optimization*, *Probability and Statistics* and econometrics.

- **Global Perspective:** Students in the international track will gain a global perspective on economics, benefiting from courses entirely taught in English. This track is ideal for those who aim to develop an international outlook and pursue careers in the global economy.

#### **English Language Requirements and Support:**

- A minimum English level of B2 is required for admission, with the goal of advancing to a C1/C2 level by the end of the program.
- Additional support will be available for students with limited proficiency in English to ensure they succeed in the program.

#### **International Mobility:**

- The program encourages international mobility, offering students the chance to study abroad in the second or third year, although this is not mandatory.
- Thanks to numerous international partnerships, students can choose from 98 destinations for exchange programs,

enhancing their global experience and broadening their academic network.

#### **Excellent Preparation for further Graduate Studies:**

The undergraduate degree in Economics is designed as an excellent preparation for further studies at the graduate level, particularly in economics and related fields

## Savoir-faire et compétences

#### **Key Skills Developed in the Economics Program:**

##### **1. Ability to Analyze Economic Data:**

- Learn how to collect, process, and interpret economic data using statistical software such as Excel and R.

##### **2. Proficiency in Economic Modeling Tools:**

- Use economic models to formulate and test hypotheses on economic issues (e.g., modeling markets, consumer behavior, etc.).

##### **3. Writing and Communication:**

- Develop the ability to write clear and well-argued economic analyses.
- Be able to present results in a structured manner, both in writing and orally.

##### **4. Critical Thinking:**

- Develop the ability to analyze and critique existing economic policies and theories.

- Identify the limitations of theoretical models and data used in economic analysis.

#### 5. Teamwork and Collaboration:

- Ability to work in teams, often in multidisciplinary projects or case studies.

#### 6. Proficiency in IT Tools:

Competence in economic software, data processing and statistical tools, as well as database management.

#### 7. Learn and Work in English in an international environment

#### Career Prospects:

In addition to these skills, the Economics undergraduate program at Sorbonne School of Economics prepares students for a wide range of careers in fields such as finance, economic analysis, market research, public management, international organizations, and consulting.

These skills and knowledge aim to provide students with a solid theoretical foundation while also developing their ability to apply theory to practical situations.
